Acknowledgements

- A small vote of thanks for all who have helped me in this journey of App Development – my parents, Ms. Shivani Srivastava , Ms. Smita and Mr. Ken Kahn

About Me..

My name is Sameer Goel. I am 16 years old and study in Modern School Barakhamba Road, New Delhi. I always had interest in AI and want to pursue it further, so I took an internship with Clevered to develop and enhance my skills.

About My Internship Journey with Clevered..

My internship experience with Clevered was wonderful. This is my first Internship and my mentors were really helpful and cooperative in teaching me about AI.

I learned a lot of new & amazing things. The experience was quite significant because this is my first step in the journey of AI.

About the App..

Hand Gesture Recognition can be used for many things:

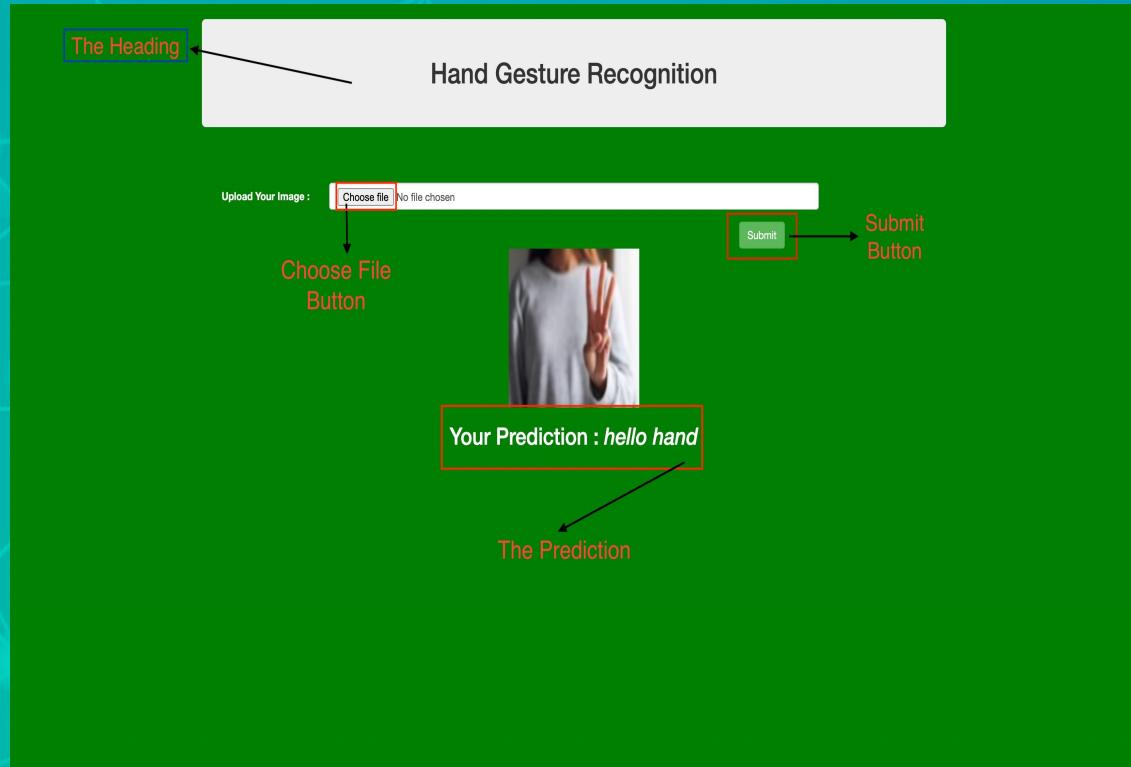

- It can be used to teach children how to count easily.
- Help people who are mute to communicate.
- In smart homes to turn off the lights just by waving your hand.
- It can be a useful tool in this pandemic era to work in a contactless manner.
- It makes the work convenient and faster.
- It has many different applications in different industries.

How to use the App?

Option Name

(This will be repeated for each option of the App)

- First, click on the choose file button.
- Then a window will appear through which you will be able to upload a file from your local system.
- Then click the submit button and the output will be displayed after that.

Contact Person

- Please reach out to Sameer Goel at goelsameer04@gmail.com for any questions/ concerns/ suggestions on the App

Thank you!
